

Syllabus for Algebra II (h)

Mr. Schroeder – Room 204

School Phone Number – (313) 382-3422 extension 204

E-mail address – Robert.schroeder@leonagroup.com

Available before school, after school, or from 2:00-3:00 with appointment.

Algebra 2 is the second Algebra class. During this course, you will use the skills that you learned in the first Algebra class and add some new ways to solve for unknowns. By the time you are finished with this course, you will be able to solve for unknowns by working algebraically, using matrices, or by graphing. You will also become familiar with quadratic equations, polynomials, and logarithms.

NOTE: This section is the honors program. Although it is NOT an AP officially designated as an AP class, the school has classified it as a higher level as it will cover the entire text in one year. (The other sections of Algebra II have been paced to cover the same material over a two year span.) This allows you to continue your education where even more higher class options exist, such as Precalculus, preparing you for college and beyond.

Textbook: Glencoe Mathematics – Algebra 2 – CD's of the text will be available for home use. Reference books can be checked out also.
